Education

Aviation and Aerospace University, Bangladesh

Jan 2022 – Mar 2026

Bachelor of Science in Avionics Engineering, CGPA: 3.75/4.00

Dhaka, Bangladesh

- **Class Rank: 4/30**
- **Last Two Years GPA: 3.91/4.00**

Professional Experience

Aviation and Aerospace University, Bangladesh

Aug 2026 – Present

Lecturer (adjunct)

Dhaka, Bangladesh

- Conduct undergraduate lectures and laboratory sessions, preparing course materials, assessments, and practical activities for effective delivery of engineering courses.
- Faculty Coordinator, AAUB Mars Rover Team “Rover 71”, providing faculty guidance and coordinating student-led engineering activities.
- Moderator, AAUB Debating Club, overseeing and supporting the club’s academic and extracurricular activities.

Research Interests

- Biomedical Signal Processing, Applied Machine Learning, Wireless Communication Networks, Explainable AI, Trustworthy AI, Intelligent Sensing System, AI in Healthcare, Federated Learning, Cyber Security

Publications

Bari, “*Robust Epileptic Seizure Detection via Multi-Artifact EEG Denoising and SE-CNN,*” 28th International Conference on Computer and Information Technology (ICCIT), Cox’s Bazar, Bangladesh, 2025, pp. 1666–1671, DOI: [10.1109/ICCIT68739.2025.11489540](https://doi.org/10.1109/ICCIT68739.2025.11489540)

Research Experience

Undergraduate Thesis

Jan 2025 – Dec 2025

Supervisor: Dr. S. M. Sadakatul Bari

Department of AE, AAUB

- **Thesis Title: A Quantum-Inspired Federated Intrusion Detection System for UAV Networks with Privacy-Aware Design**
- Designed a privacy-preserving Intrusion Detection System (IDS) for UAV/FANET networks using Federated Learning (FedAvg) to enable distributed training without centralizing sensitive telemetry data.
- Developed a quantum-inspired kernel-based feature extraction pipeline with Nyström approximation, improving intrusion detection under non-IID and resource-constrained UAV environments.
- Evaluated adversarial robustness of the IDS through FGSM and PGD stress testing, analyzing resilience against evasion and transfer-style attacks.
- Integrated privacy-aware aggregation mechanisms (DP-based noise injection and secure-aggregation-compatible designs) to reduce information leakage while maintaining detection performance.
- Performed comparative experiments between centralized and federated settings, analyzing trade-offs among detection performance, privacy, communication overhead, convergence, and robustness.

Relevant Coursework

- | | | |
|----------------------------------|---------------------|------------------------------------|
| • Signals and Systems | • Control Systems | • Microprocessor & Microcontroller |
| • Digital Signal Processing | • Machine Learning | • Real Time Embedded Systems |
| • Data Structures and Algorithms | • Radar Engineering | • Communication Systems |

Projects

FM Transmitter Design and Simulation

Oct 2024 – Nov 2024

| Communication Systems Sessional | Supervised By: Dr. Md. Sakir Hossain

- Simulated an FM transmitter using MATLAB and Simulink to study frequency modulation principles, including carrier wave modulation and noise resistance.
- Implemented a practical FM transmitter using EasyEDA with components like a microphone, LM386N amplifier, 24 MHz crystal oscillator, and antenna to achieve wireless communication.

Orthogonal Frequency Division Multiplexing (OFDM)

Sept 2024 – Nov 2024

| Communication Systems | Supervised By: Dr. Md. Sakir Hossain

- Simulated and analyzed an OFDM communication system in MATLAB, enabling efficient data transmission by dividing data into orthogonal subcarriers.
- Simulated key parameters such as Bit Error Rate (BER) and Signal-to-Noise Ratio (SNR) in MATLAB, validating system performance under noise and interference.
- Investigated resilience to multipath fading and implemented FFT/IFFT for efficient signal processing.

Technical Skills

Programming Languages: C, C++, Python
Python/ML Libraries: NumPy, Pandas, Scikit-learn, TensorFlow/PyTorch, Matplotlib
Simulation Software: MATLAB Simulink, SolidWorks Simulation
Data/Visualization Tool: OriginLab, Tecplot 360
Documentation & Productivity: Microsoft Office Suite, LaTeX
Design Software: Adobe Photoshop, Adobe Illustrator, Canva

Achievements & Awards

- Chancellor’s Scholarship for academic excellence (Jun 2025 Semester)
- Pro-Vice Chancellor’s Scholarship for academic excellence (Jan 2024, Jun 2024 & Jan 2025 Semesters)
- University Merit Scholarship (Jun 2021 & Jan 2022 Semesters)
- 3rd Place, Secondary Category, Inter School Annual Science Fair, Sher-e-Bangla Nagar Govt. Boys’ High School (2016)

Extracurricular Activities

- Vice President, AAUB Debating Club (2024 & 2025)
- Vice President, AAUB Career Club (2025)
- Director (Publication, Communication & Outreach), AAUB AI & Robotics Club (2023 & 2024)
- Finance Secretary, AAUB Adventure & Photography Club (2024 & 2025)
- Web Manager, AAUB Sports Club (2024 & 2025)

Industrial Experience

208 MOU & 216 MRO Unit, Bangladesh Air Force (BAF) Base Bashar

Jun 2024 – Jul 2024

Industrial Trainee

Dhaka, Bangladesh

- Hands-on experience with the maintenance and overhauling of Bell 206, Bell 212, and MI-17 helicopters in 208 MOU and 216 MRO units.
- Collaborated with teams to observe and participate in repair, maintenance, and overhauling operations, ensuring operational readiness of the aircraft.

Certifications

- Coursera – Machine Learning Specialization by DeepLearning.AI & Stanford University
